- HTML
- CSS
- PHP
- SQL
- MONGODB

PROJECT

Home Service OS Platform | Academic Project

- Overview: Created a web-based platform facilitating the booking of home services, improving accessibility to local service providers.
- Back-end: Developed robust server-side logic and dynamic web pages using PHP, integrating secure user login systems.
- Database: Managed relational data, including appointments and service categories, using MySQL.
- Front-end: Designed an intuitive and responsive front-end interface using HTML, CSS, and JavaScript.
